ABOUT ME

Software Developer specializing in backend development. Experienced with agile methodology for dynamic web projects. Well-versed in numerous programming languages and frameworks including PHP, Laravel, JavaScript, VueJS, ReactJS, Tailwind, and MySQL

EXPERIENCE

Full Stack Developer

VIPTutors Co.

London, England (Remote)

JUNE 2025 – APRIL 6, 2025

❖ Migrated existing applications from CodeIgniter to Laravel, improving scalability, maintainability, and performance.
❖ Integrated AI-powered functionalities (e.g., speech analysis, NLP, auto-generation) using APIs like AssemblyAI and OpenAI.
❖ Developed and maintained responsive front-end interfaces using Vue 3 (Composition API).
❖ Supported and maintained legacy CodeIgniter systems during transition phases.
❖ Designed and implemented RESTful APIs in Laravel with authentication, caching, and queue management.
❖ Zoom Meeting Integration for seamless communication between tutors and students, enhancing user experience and engagement.
❖ Leveraged OpenAI, Gemini, and DeepSeek APIs to power post-session summaries, automated quiz and flashcard generation, and personalized learning recommendations.
❖ Utilize AI services such as AssemblyAI for speech analysis, GPTZero for content originality detection, and SpeechSuper for speech-to-text conversion.

Software Developer I

ADEC Innovations

Muntinlupa, Philippines (Remote)

NOVEMBER 2024 – MARCH, 2025

❖ Developed an internal web application using React, React Query, ShadcnUI and TypeScript that enabled users to access the company's resources with ease
❖ Maintain and support internal web applications by developing and enhancing features using AngularJS for the frontend and Java Spring Boot for the backend
❖ Collaborate with cross-functional teams to gather requirements, design solutions, and implement features that meet business needs
